The Never-Miss® Finishing System

Never-Miss® Colour Gel and Final Coat Finishing System is a patented, breakthrough formula designed to enable the drywall professional to consistently achieve a high quality finish with less time, effort and cost.

Colouring Gel dries highly visible; when the surface is sanded, the colour dissipates preventing over sanding. When added to joint compound:

- Provides extreme visibility
- Track job progress
- Self Priming
- Eliminates paint flashing

Final Coat Ultra White Gel gives a **Level 5** finish for both smooth and textured surfaces when added to joint compound. Apply by either spraying or roll skimming. As Final Coat dries and cures, it becomes scratch and nick resistant. No priming required.
